

Instructor:

Vu Dinh
Email: vucdinh@udel.edu
Office: Ewing 312

For questions about homework or material, consult me during office hours or by email. Please include the course number in the subject line of the email.

Class Times: Tuesday–Thursday 9:30-10:45 am, Gore Hall 115

Office Hours: Tuesday 1-2 pm, Wednesday 11am-12pm, Ewing Hall 312.

Web page: <http://vucdinh.github.io/m450f17>

Visit this page regularly. It will contain homework assignments, lecture plans, etc.

Prerequisites: Algebra, calculus, and MATH350 or an equivalent course in probability.

Reference: *Modern mathematical statistics with applications*, Second Edition by Devore and Berk. Springer, 2012. The text is available online from the UD library. This text is required.

Topics: The aim is to cover Chapters 1 and 6-12. Topics include sampling distributions, parameter estimation, maximum likelihood estimation, hypothesis testing, confidence intervals, correlation and regression.

Homework: Assignments will be posted on the web every other Tuesday (starting from the first week) and will be due on Thursday of *the following week, at the beginning of* lecture. No late homework will be accepted. Your two lowest homework scores will be dropped in the calculation of your overall homework grade.

Quizzes: To encourage you to keep up with reading and understanding the concepts, at the end of every chapter, there will be a short, multiple choice quiz during class. The quiz dates will be announced at least 1 class in advance. Your lowest quiz score will be dropped.

Exams: There will be a midterm on 10/26 and a final exam during exams week.

Evaluation:

- Overall scores will be computed as follows:
25% homework, 10% quizzes, 25% midterm, 40% final
- No letter grades will be given for homework, midterm, or final. Your letter grade for the course will be based on your overall score.
- The two lowest homework scores and the lowest quiz score will be dropped.
- Here are the letter grades you can achieve according to your overall score.

- $\geq 90\%$: At least A
- $\geq 75\%$: At least B
- $\geq 60\%$: At least C
- $\geq 50\%$: At least D

Data Analysis: We will do data analysis using an open source statistical system called R

<http://cran.r-project.org/>

To install R:

- Windows: Go to <http://cran.r-project.org/bin/windows/base/> and download using the link saying “Download R 3.x.y for Windows”
- Mac: <http://cran.r-project.org/bin/macosx/R-latest.pkg>
- Linux: Go to <http://cran.r-project.org/bin/linux/> and download as needed.
- To program in R, you have the option to work in RStudio, an open source development environment <http://www.rstudio.com/ide/download/>.

Ethics:

- You **must** write up solutions on your own.
- You may **never** read or copy solutions of other students.
- For each homework, you **must** write your name and UDel ID.
- You may use books and online resources for help, but you **must** credit all such sources and **never** copy the material verbatim.

Please refer to UD’s Guide to Academic Integrity <http://www.udel.edu/studentconduct/ai.html>. In particular, note that copying solutions in whole or in part from other students or **any other source** without acknowledgement constitutes cheating. Any student found cheating risks automatically failing the class and will be referred to the Office of Student Conduct.
